

Al Frank Value

THIRD QUARTER 2011

Investment Strategy

Al Frank Value is a fully invested, actively managed equity strategy that seeks capital appreciation over the long term. The portfolios include both dividend and non-dividend paying stocks and broad diversification is sought via exposure to a significant number of major market sectors and industry groups. Portfolios are constructed initially with equally weighted dollar positions across at least 50 individual holdings.

About AFAM

Founded in 1977, Al Frank Asset Management (AFAM) is an independent Registered Investment Advisor based in Aliso Viejo, CA. The firm exercises diligence and prudence in applying a value-based investment philosophy to help meet the investment goals and objectives of individuals, corporations and pension and profit sharing plans. AFAM offers two value-oriented, no-load proprietary mutual funds and individually managed client accounts. AFAM also serves as editor of *The Prudent Speculator* newsletter, a top-ranked investment newsletter in terms of total return performance according to the *Hulbert Financial Digest*.

Disclosures

The Value Composite, formerly known as Multi-cap Value, includes discretionary equity portfolios using our standard value strategy of buying undervalued and/or out-of-favor stocks and holding them in broadly diversified portfolios for their long-term appreciation potential. For comparison purposes, the composite is measured against the Russell 3000 Index, a broad market index of the U.S. equity universe. On September 30, 2008, the manager standardized its benchmarks on the Russell family of Indexes and changed the benchmark from the Wilshire 5000. You cannot invest directly in an index. The minimum account size for inclusion in this composite is \$100,000. The Value Composite was created December 2005.

Al Frank Asset Management (AFAM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. AFAM has been independently verified by Ashland Partners & Company, LLP from for the periods Jan. 1, 1996, through June 30, 2011. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The Value composite has been examined for the periods Jan. 1, 1996, through Dec. 31, 2010. The verification and performance examination reports are available upon request.

AFAM is an independent, registered investment adviser, wholly owned by AF Holdings, Inc. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Non-fee-paying portfolios are included and represent less than 1% of the composite. From 1993 to 2000, non-fee-paying portfolios represented up to 5% of the composite. Prior to 1993, non-fee-paying portfolios represented up to 8% of the composite. Beginning January 1, 2006, composite policy requires the temporary removal of any portfolio incurring an aggregate net cash flow of at least 25% of portfolio assets. The temporary removal of such a portfolio occurs at the beginning of the month in which the significant cash flow occurs. The portfolio re-enters the composite at the beginning of the month after a net cash withdrawal and returns to the composite two full months after a net cash inflow. Beginning January 1, 2006, this policy was quarterly and beginning January 1, 2010, the policy is monthly.

Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the effects of trading costs and reinvestment of all income. Net of fee performance was calculated using actual management fees charged to the client. The annual composite dispersion is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Actual investment management fees vary beginning at 2% per annum. Our full management fee schedule is described in more detail in AFAM's Form ADV Part 2A.

Valuation metrics are the weighted-average of the ratios of all the holdings in the Composite and Index. Alpha is a measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. Beta is a measure of volatility, or systematic risk, of a portfolio in comparison to a benchmark. A beta greater than one indicates more volatility, while a beta less than one indicates less volatility than the relevant benchmark. Annualized Standard Deviation is a measure of the dispersion of investment returns from the mean. A higher standard deviation indicates higher volatility.
